The skill gap: Find a significant gap in students' technology skills and market requirements. They are aware of the terminology but don't know how to use it.

The training adequacy: Hands-on experience is inadequate.

The curriculum: As per discussion with students, we found that Institute need to include new technology in the curriculum.

Fwd: Feedback on Wiley India

PLACEMET CO-ORDINATOR EEE <pc.eee@rmkec.ac.in>   Wed, Sep 29, 2021 at 9:31 AM
To: RMK Placement RMK Placement <tnp@rmkec.ac.in>, RMK INSTITUTIONS <placement@rmkec.ac.in>
Cc: HOD Electrial & Electronics <hod.eee@rmkec.ac.in>

Respected Sir/Madam,
Keerthivasan from 2021 batch , shared the feedback regrading the Wiley India
The feedback is furnished below for your reference

Good Evening,

I got selected by Wiley for **mthree Alumni Program**(https://www.mthree.com/for-graduates/). It was a internship and placement program.

What is the program?

      Wiley hires freshers and provide them training based on their client demands and share their candidates profile with them. Clients shortlist few candidates and conduct interview and select the candidates.

      The selected candidates are then employed under Wiley and deployed on site at the clients as per the role they were trained(Application developer, System Engineer, etc.,).

      Based on the client the candidates will be under Wiley for 1 or 2 years and based on the performance the candidates will be made as an employee of their clients

Pros:

     1. Training they provide is very good
     2. Their clients are International Banks
     3. Salary is very high(12-15 LPA after Absorption by clients)
     4. One candidate can attend another client if he fails the previous client interview

Cons:

     1. Most jobs are in Bangalore/Mumbai
     2. There is a lot of uncertainty(absorption by clients is not guaranteed)
     3. Job Security
     4. Will be a contingent employee for 1 or 2 years at client site

- Students who are confident that they can clear the interviews and perform well during the contingency period can get a good start in their career.
- The training provided by them will help the candidates to clear tougher interviews even f they aren't able to clear their clients.
- I have seen many students who found other jobs with pay scale above 10 LPA during this internship.

Campus Hiring 2021 Batch - Likewize (Previously known as Brightstar)

Rajalakshmi Subramanian <Rajalakshmi.Subramanian@likewize.com>   Fri, Oct 22, 2021 at 3:27 PM
To: RMK INSTITUTIONS <placement@rmkec.ac.in>

Dear Mr Prabhu,

We are delighted with our association with RMK group last year for the placement. The ~30 graduates we hired from your institution are performing extremely well and has been fulfilling our expectation more than what is required. I want to place in record that, this was our first ever Campus hiring in India and our global leadership team couldn't be more happier with the quality.

With this note, we would like to continue our relationship this year as well. Attached is the presentation for 2022 Batch. We have increased our Offer package from INR 7L PA to INR 7.5 L PA to meet the dream company status as per your policy.
Would appreciate if you could share me the interested students' detail in the attached format and we will take it from there! As discussed with you recently, we would like to conduct the final interview on campus as that would create a bigger branding impact for us!

Regards,

Rajalakshmi Subramanian

Subject: Request for HR Feedback_2022 batch_reg

Dear Mr. Balaji,

Greetings from R.M.K Group of Institutions

We request you to kindly share the Feedback of Virtual Interview conducted during the year 2021-2022

Company Name: Hubstream India Private Limited

Interview   Date: 16-Aug-2021 to 20-Aug-2021

(i) Feedback about students' skills: '

- Students can able communicate effectively during the interview.
- We see students are struggling to do basic programming in any language like C, C++, C#, Java. If the college can give more coaching to students to practice/train programming skills it will be helpful for us as well as to the Students.

(ii) Effectiveness of Virtual Interview:

- It will be great if will be an in-person interview as we can be able to view the discussion with students face to face.
- Virtual interviews give flexibility of having interviews late evening but few students have a challenge of connectivity issue which lead to delay or not an effective interview.

(iii) Suggestions for improvement (if any)

- Please get concurrence from students to participate in the interview of our company and also share only the student list who is interested in joining our company if selected.
- If a company offered to the students, pls don't allow students to participate in any other company interview that will be a great help for us as we plan our budgeting like seating, hardware based on our recruitment but students drop out in the last min which affects our planning.

·

Regards,
Dr. K.K.SivagnanaPrabhu
