## **IT Integrated Examination Procedures and Continuous Internal Assessment System (CIA)**

Examination process aims at measuring the degree of knowledge assimilated by the students during a course of study or training imparted to them. Assessment and evaluation are the major tools to verify the attainment of COs, POs and PSOs of the curriculum. The End semester examination (theory and practical) is conducted between October and December during the odd semesters and between April and June during the even semesters. Apart from End Semester Examinations, students are evaluated through Continuous Internal Assessments (CIA).

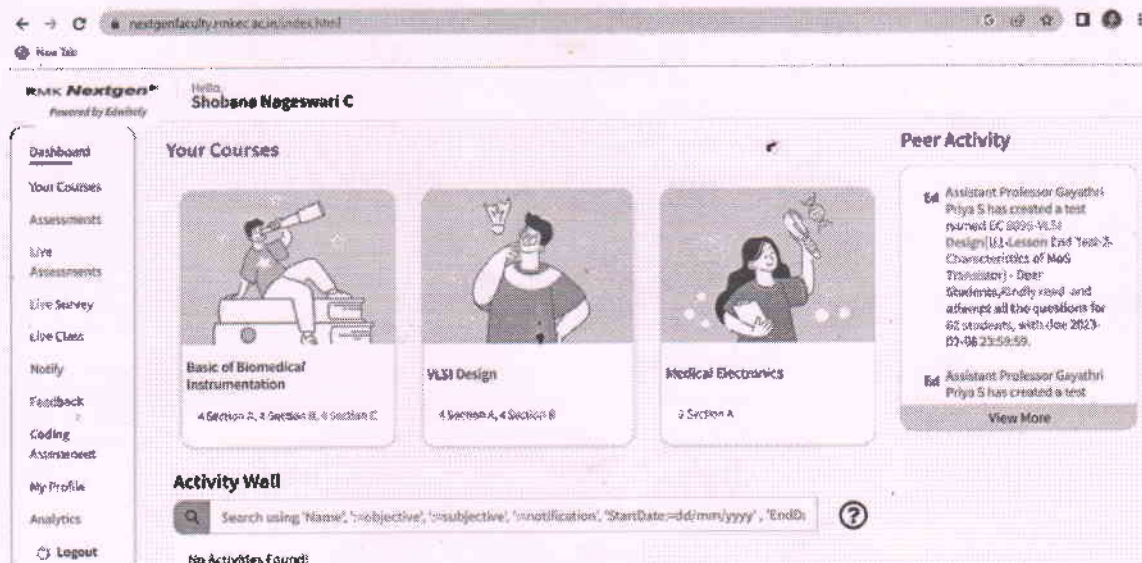

CIA tests for theory are centrally administered by the College through the Examination Office. Three Continuous Internal Assessment Examinations are conducted as per the Academic Calendar. All three assessment tests are conducted for 100 marks with 3 hours duration. Question Bank for every course is provided by course faculty members and course coordinator. Smartpick software tool is used to select questions and generate the question paper from the question bank. At the end of every test, the evaluated answer scripts are returned to the students and their performance is evaluated suggesting improvements, if needed. This enables the students to perform in a better way in the next test. Other components like Assignments, Projects, MCQ tests are also used by the course coordinator for assessing the performance of the students. RMKNextgen Application helps in conducting periodic MCQ tests and provides formative assessment for gap analysis.

Examination procedure has been completely automated using EMS. Examly software is used for hall ticket generation, online evaluation, Result publication and generation of marks statement. Examiners are provided with login and password for the digital evaluation. The answers scripts are coded to prevent disclosure of identity of students. Scheme of evaluation along with solutions are made available to the examiners through pre evaluation board meeting. Third Evaluation – If the difference

in evaluation between first and second examiner is more than 15 Marks, then automatically the script is evaluated by third evaluator. Photo copies of answer scripts are provided to the desired students on application.

A result passing board meeting is conducted in the presence of AU nominee to analyze examination results. After getting approval from AU nominee, the results of the examinations is declared and published on the Examly portal. Grade sheets are printed and issued to students.
