CANCER AWARENESS EXHIBITION REPORT

Title: Cancer Awareness Exhibition

Date: from 4.02.2023 to 07.02.2023

The NSS Unit of RMDEC along with The Cancer Institute (WIA) organized a three-day Cancer Awareness program on our campus from 4th February 2023 to 7th February 2023. The objective of this program is to create awareness about cancer and its causes among the youth, who are the future of our society.

The program created overwhelming response among the students and the faculty. 1500 students and nearly 180 faculty members benefitted from this program. The program was well-planned and organized and there was a high level of interest among the campus community to learn about cancer and its effects.

Cancer is a complex disease, and it's important to educate people about its causes, symptoms, and treatment options to remove the stigma and the fear about the disease. The awareness camp would have provided valuable information to the participants about the importance of early detection and prevention of cancer.

Such sustainable practices are critical to the overall development of youth. By raising awareness about cancer, the initiative has taken an important step toward creating a healthier and more informed society. We hope that such initiatives continue to take place in the future to create greater awareness about various health issues among the youth.

From February 4th to February 7th, 2023, a three-day Cancer Awareness program was held on our campus, which was organized by the NSS Unit of RMDEC and The Cancer Institute (WIA).

It's even more impressive that the program benefitted around 1500 students and nearly 180 faculty members.

As part of the exhibition, the Honorable Research Dean Dr.K.K. Thyagarajan visited the cancer awareness bus, which was a part of the three-day Cancer Awareness program organized by the NSS Unit of RMDEC and The Cancer Institute (WIA) on our campus from February 4th to February 7th, 2023.

During the three-day Cancer Awareness Program organized by the NSS Unit of RMDEC and The Cancer Institute (WIA) on our campus from February 4th to February 7th, 2023, the cancer bus was part of an exhibition visited by the Honorable Principal Dr. N. Anbuezhian.
